INTRODUCTION

Engineering student specializing in Artificial Intelligence and Machine Learning, with a strong interest in technology and problem-solving. Experienced in Python, basic Java, and front-end tools like HTML, CSS, and Figma. Enthusiastic about learning, collaboration, and building practical solutions.

EDUCATION

Dayananda Sagar Academy of Technology and Management *2023 – Present*

Bachelor of Technology in Artificial Intelligence and Machine Learning 7.01 CGPA

TECHNICAL SKILLS

Programming: Python Java (Basics)

Web / Tools: HTML, CSS, Figma, Git (Basics)

Soft skills : Communication | Teamwork | Time Management | Problem-Solving | Adaptability

INTERNSHIP *2025*

SMAP Technologies Pvt. Ltd.

Developed an AI-based virtual mouse using Python, OpenCV, MediaPipe, and PyAutoGUI to enable hands-free computer interaction through real-time hand gesture recognition. Implemented MediaPipe hand tracking to detect finger landmarks and translate specific hand gestures into mouse actions such as cursor movement, left/right clicking, and scrolling. Applied smoothing and filtering techniques to minimize cursor jitter and improve movement accuracy, responsiveness, and overall user experience

PROJECTS

AI Virtual Mouse Using Hand Gesture Recognition GitHub

Worked as an Intern at SMAP Technologies, contributing to the testing and validation of a software project. Performed functional testing to identify bugs, verify application features, and ensure that the system worked as expected. Assisted in checking different functionalities, reporting issues, and validating fixes to improve the overall reliability and quality of the application

Plant Profile Management System in Smart Gardening

Developed a full-stack Plant Profile Management System using Python, Flask, MySQL, HTML, CSS, and JavaScript to efficiently manage and organize plant-related data. Implemented CRUD functionality for plant profiles along with role-based authentication and access control. Integrated the Flask backend with MySQL for reliable data storage and retrieval, and designed a user-friendly web interface for seamless plant information management.

ACHIEVEMENTS & VOLUNTEERING

Achievements:

- Published research work titled “Predictive Fault Detection in Pre-Release Devices and Systems” presented at IEEE ICSCSA 2025.

Volunteering:

- Volunteered in a Debugging Contest and organized the AIML Cultural Fest
